

Adagio

Rey Adagio, a guaranteed eco-friendly product.

Rey Adagio is manufactured in France, on a production site which is well recognized for its environmental performances. The wood which we use comes from sustainably managed forests located near the mill. We do not import wood or pulp.

Green energy (biomass) meets 85% of our energy needs.

The production site sets worldwide standards for low greenhouse gas emissions. It is ISO 9001 (quality), ISO 14001 (environment) and OHSAS 18001 (safety and security) certified.

The EU Ecolabel is the official EU eco-certification. This label is only awarded after strict assessment of a product's impact on the environment throughout its life-cycle.

The PEFC logo guarantees that the product is made from sustainably managed forests.
