

Eclipse Blue & Green

Social & Environmental Excellence

Eclipse is manufactured in Brazil by Suzano Papel e Celulose. The company has achieved certification in social and environmental standards recognised worldwide.

Eclipse is FSC® certified to ensure that pulp used in its production comes from properly managed sustainable forests. Eclipse is produced from elemental chlorine free (ECF), 100% Eucalyptus fibre pulp.

Suzano is an integrated manufacturer which means it plants its own forests, harvests its own trees and manufactures its own pulp and paper. In 2012 the World Wildlife Foundation (WWF) ranked Suzano at number 2 in its Environmental Paper Index for fine papers.

Suzano holds one of the broadest ranges of forestry certifications in this sector, demonstrating that their management meets the highest social and environmental standards.

Certifications include the following accreditations: ISO14001 (Environmental), ISO9001:2000 (Quality) and OHSAS 18001 (Health & Operational Safety).

In addition to our environmental policies Suzano is committed to an active corporate and social responsibility programme that includes locally based training and education programmes for the communities in which we operate. Suzano also provide healthcare and education programmes for the urban communities local to our production units. The company is listed on the corporate sustainability index of the Sao Paulo stock exchange; this is based upon the FTSE4GOOD model used in London.
